

Scripts de transformations

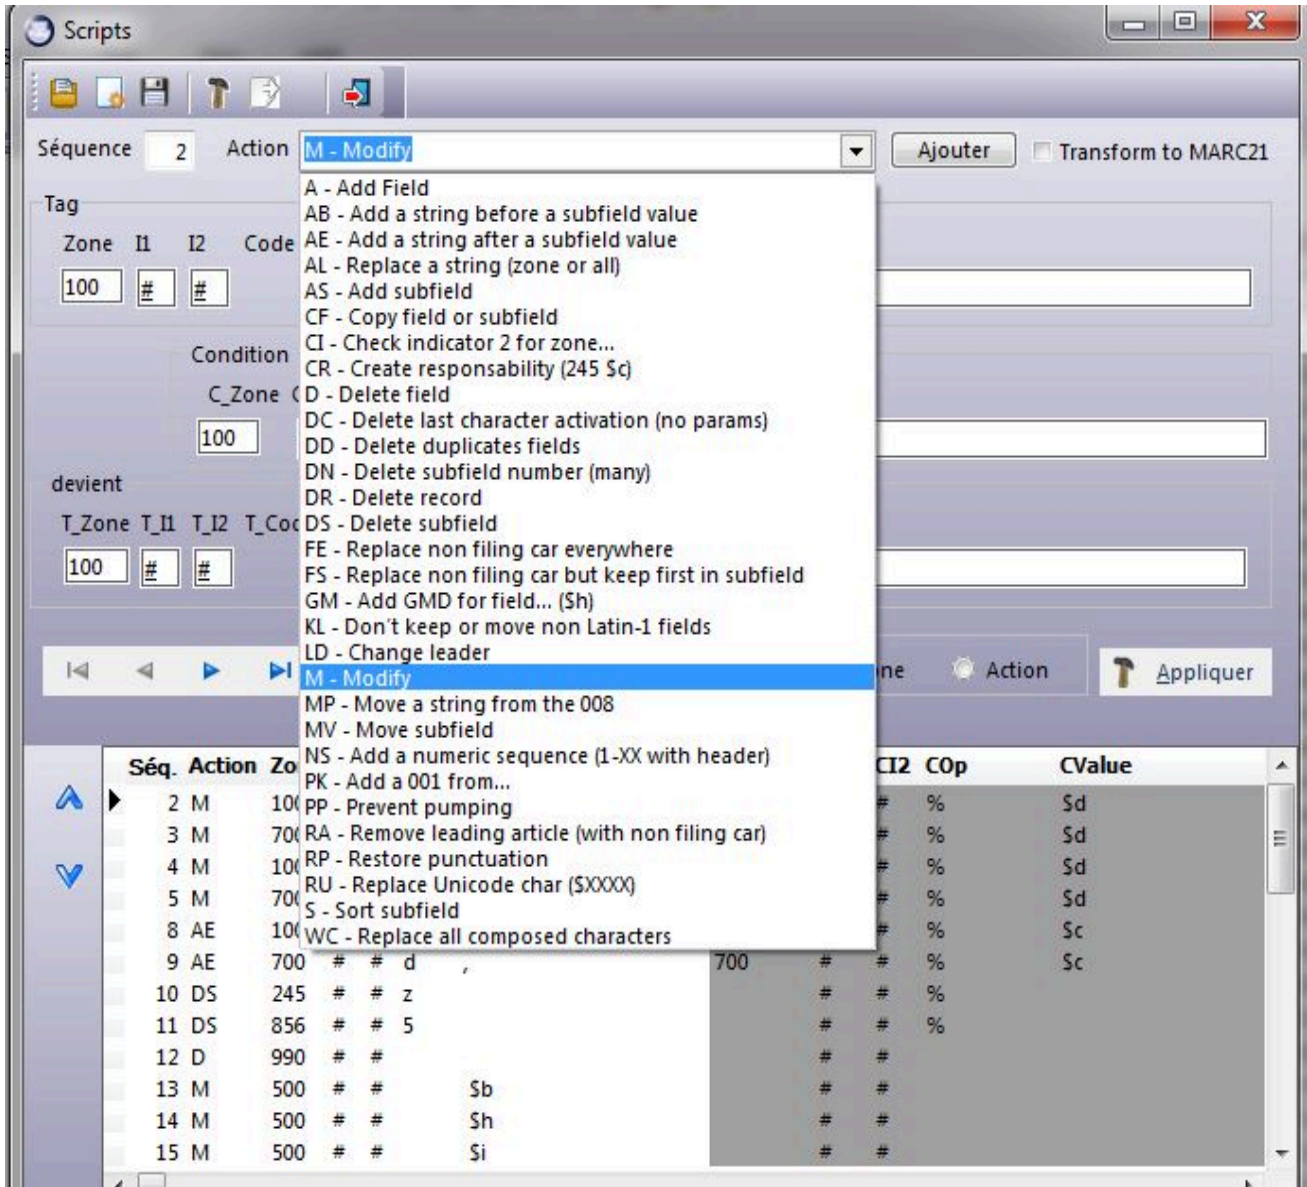

Menu "Outil - Transformer" 

Cette option d'EZPump vous permet d'appliquer des changements sur soit un ensemble de résultats soit un fichier importé. Les "actions" sont effectuées séquentiellement selon un ordre que vous définissez.

Vous pouvez

- Ajouter un champ
- Effacer un champ
- Ajouter un sous-champ
- Effacer un sous-champ
- Modifier un champ, indicateur 1, indicateur 2, une valeur d'un champ, sous-champ etc...
- Transformer certaines positions du leader
- Trier les sous-champs
- Déplacer un sous-champ d'une zone à l'autre
- Effacer tous les sous-champs successifs sauf le xième sous-champ
- etc...

Le tout avec gestion des indicateurs

The screenshot shows the 'Scripts' window in EZPump. The 'Séquence' (Sequence) is set to 2, and the 'Action' is 'M - Modify'. A dropdown menu is open, listing various actions such as 'A - Add Field', 'AB - Add a string before a subfield value', 'AE - Add a string after a subfield value', 'AL - Replace a string (zone or all)', 'AS - Add subfield', 'CF - Copy field or subfield', 'CI - Check indicator 2 for zone...', 'CR - Create responsibility (245 \$c)', 'D - Delete field', 'DC - Delete last character activation (no params)', 'DD - Delete duplicates fields', 'DN - Delete subfield number (many)', 'DR - Delete record', 'DS - Delete subfield', 'FE - Replace non filing car everywhere', 'FS - Replace non filing car but keep first in subfield', 'GM - Add GMD for field... (\$h)', 'KL - Don't keep or move non Latin-1 fields', 'LD - Change leader', 'MP - Move a string from the 008', 'MV - Move subfield', 'NS - Add a numeric sequence (1-XX with header)', 'PK - Add a 001 from...', 'PP - Prevent pumping', 'RA - Remove leading article (with non filing car)', 'RP - Restore punctuation', 'RU - Replace Unicode char (\$XXXX)', 'S - Sort subfield', and 'WC - Replace all composed characters'. The 'M - Modify' action is currently selected in the dropdown.

Séq.	Action	Zo	CI2	COp	CValue
2	M	100	#	%	Sd
3	M	700	#	%	Sd
4	M	100	#	%	Sd
5	M	700	#	%	Sd
8	AE	100	#	%	Sc
9	AE	700	#	%	Sc
10	DS	245	#	%	
11	DS	856	#	%	
12	D	990	#	%	
13	M	500	#	%	\$b
14	M	500	#	%	\$h
15	M	500	#	%	\$i

Vous pouvez appliquer ces transformations uniquement si la condition que vous avez définie est remplie.

D - Delete field C:\ezpump\T_SUDOC.xml

Vous pouvez ensuite **exporter** les notices transformées en ISO ou MARCXML.

Pour faciliter la gestion des transformations, une **exportation du script codé** vers Excel, Word, HTML, presse-papier etc... permet plus de lisibilité.
